## SHOWER ENCLOSURES SHOWER SCREENS

DUSEL shower enclosures integrate modern design, precise manufacturing and high quality components. We produce all major components, including the glasses, frames, hinges, door handles and the base in-house.

This provides us with the total control over our product quality and puts us in front of most of our competitors.

## German Design & Quality Concept

Over decades, German engineered products have been considered the benchmark in technology and quality. German products have been engineered to simply work perfectly. The constant drive to improve on the status quo and craft better engineered products created a powerful, world famous image.

At Dusel we embrace this tradition of never being content with the present status in all our business activities. We design, manufacture and distribute high quality shower enclosures to an international audience. Dusel stands for innovative design, focus on quality and integrity. Being distributed worldwide, Dusel products contribute to better life quality for its international customers. Ever since the very first day all of our business activities have been built on three columns: innovation, quality and people.

## Our Values

In all our business activities we embrace our core values:

- **Quality:** We manufacture high quality and durable products.
- **Integrity:** We are real and stand by our word.
- **Dedication:** We believe in our mission and pursue the best possible results.
- **Passion:** We love what we are doing.
- **Innovation:** We constantly question and improve.

## Innovation

At Dusel we never stand still. We are always thriving to improve ourselves, our products and the support we provide to our customers. Working close with our customers, identifying their needs and listening to their suggestions have allowed us to create products close to the pulse of time and to their future users' requirements. All our products are designed and engineered in-house. This guarantees short distances, immediate feedback and enables us bringing new ideas to the market sooner.

## Quality

Dusel Shower enclosures have been designed, engineered and tested to last. We set ourselves a strict quality policy against which we measure all our activities. For us quality is a broader concept than purely products of high quality. We see customer satisfaction and service quality as integral parts of our quality approach.

## People

One of the secrets of our success is the people behind the business. Experienced management, innovative designers, well-trained engineers and motivated workers are at the heart of Dusel. Our team is dedicated to create products that make the most important people happy: our customers.

DUSEL

DL

DL Series shower enclosure feature ultra-slim top and bottom profiles. Clever engineering makes the rollers practically invisible from the outside, all for a clean look. Easy Installation and Easy Cleaning come as standard. All DL-Series models are available in durable automobile grade black or traditional chrome finish.

# MINIMALIST IN EVERY ASPECT

Ultra-Slim Profiles: DL series shower enclosures feature ultra-slim aluminium frame profiles without compromising stability or functionality.

Every detail has been design with the same design language in mind.

The shape of the door handles elegantly resonates the ultra-slim profiles' characterizing look.

DUSEL

EF

All EF series shower enclosures are the result of experience and extensive engineering. Easy quick installation has been at the top of our list of objectives. A clever fast-assembly rail system connects post and rail profiles with an internal clip.

These shower enclosures feature our latest aluminum profiles with concealed construction. All screws neatly hide inside the wall profiles and create a simply neat look.

## Concealed Mounting Points

The two profiles are fixed by a magic device at top of profile, smart and nice. Nothing disturbs the clean lines.

# It's All About The Details

A great product is all about the details. Dusel shower enclosures are designed with maximum attention to detail, every detail. Beautifully designed and carefully crafted components unite to great shower enclosures. Hidden fixtures, concealed profiles and minimalistic hardware are just a few of the outstanding features.

Every product design is carefully engineered and re-lentlessly tested before being considered ready for the market. Dusel stands for dedication and dependability.

**1. Zinc Alloy Door Handles**

All EF series shower enclosures feature elegant zinc alloy door handles. Easy to use and minimalist design.

2

3

**2. Fast Assemble Rails**

Trouble-free installation thanks to our in-novative fast assembly rail. Rail and post profiles are connected by a clip system.

**3. + 4. Quick-Release Roller**

All EF series shower enclosures come with factory pre-installed quick-release rollers. at the top and bottom of the door.

4

DUSEL

DA

After a long and hard day you are looking forward to a break, time for yourself and relaxation. Freestanding Dusel bathtubs incorporate modern design, ergonomic shapes and attention to detail. All Dusel products are carefully designed and engineered for a great bath experience, long product life and minimalist aesthetics.

Choose from a range of different shapes and dimensions. All Dusel bathtubs feature premium acrylic surfaces and built-in drainers with overflow and siphon.

### 1. Overflow Drainer

All DA Series bathtubs feature a built-in overflow system with a neat decorative chrome cover. The overflow makes sure that the water stays where it is meant to.

### 2. Push-to-Open Drainer

A pre-fitted drainer is part of all DA Series bathtubs. A clever Push-to-Open mechanism means no bulky handle, clean lines and practicality in one.
